LA TECHNOLOGIE SPRINTFILTER

Une gamme de 4 filtres à air a été développée en fonction de vos besoins : P08, P037, P08F1-85 et R (structure carbone majorée).

Ces filtres à air brevetés ont de multiples avantages :

- Membrane polyester brevetée avec des trous calibrés
- Surface de filtration augmentée (le double d'un filtre à air route ou racing classique)
- Sans entretien (pas d'huile, nettoyage par soufflage)
- Flux d'air constant, homogène et régulé quelle que soit la vitesse
- Imperméable (P037, P08F1-85 et R)
- Pouvoir de filtration supérieure aux autres filtres sur le marché
- Plus de puissance moteur
- Jusqu'à 3 fois plus d'air que le filtre d'origine
- Filtres plug and play (montage immédiat)
- **Aucune reprogrammation n'est nécessaire**

Modèle	Usage conseillé	Entretien	Codes	Durée de vie	Imperméable	Pouvoir de filtration	
Filtre P08	Le filtre route en remplacement de l'origine	Route / piste	Sans entretien	-S	A vie *	Non	80 µm
Filtre T12	Le filtre pour des conditions extrême	Cross / Enduro	Sans entretien	-T12	A vie *	Oui	12 µm
Filtre T14	Le filtre pour des conditions poussiéreuse	Trail / Enduro	San entretien	-T14	A vie *	Oui	14 µm
Filtre P037	Filtration 37 µm et waterproof	Route / piste	Sans entretien	-S-WP	A vie *	Oui	37 µm
Filtre P08F1-85	Filtration 22 µm, jusqu'à 3 fois plus performant que l'origine	Route / piste	Sans entretien	-S-F1-85	A vie *	Oui	22 µm
Filtre R	Filtre majoré par rapport à l'origine + structure carbone	Compétition	Sans entretien	R-	A vie *	Oui	22 µm

* Si correctement utilisés, sans produits agressifs et simplement soufflés.

Sans entretien :

- Pas d'huile
- Simplement souffler le filtre dans la direction opposée de l'aspiration naturelle
- Remonter sans temps de pause (pas de séchage nécessaire)
- Profiter de la puissance !

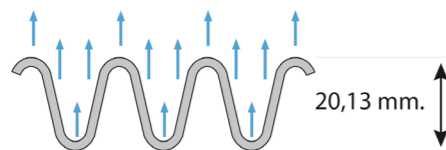

- + De Filtration
- + D'air
- + De puissance
- D'entretien

Filtres à air imperméables (versions P037 P08F1-85 et R)

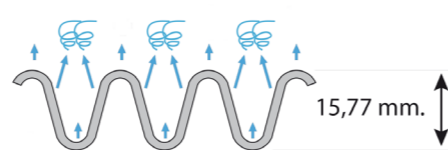

Filtres RSV4 : PM147S-F1-85

Surface de passage d'air et de filtration augmentée (+50%)

Membrane polyester calibrée Sprintfilter : Flux d'air constant et calibré

Augmentation de la surface de filtration et de passage d'air.

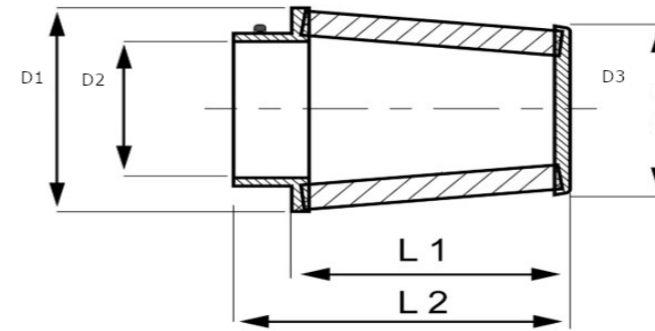

Couches de coton filtre à air classique : le tissu n'étant pas homogène, la filtration n'est pas homogène et le flux d'air est perturbé.

FILTRES A AIR SPRINTFILTER UNIVERSELS

En plus de sa large gamme dédiée aux motos précédentes, Sprintfilter a développé une gamme de filtres à air universels de différentes formes et de différentes tailles afin de répondre à tous vos besoins :

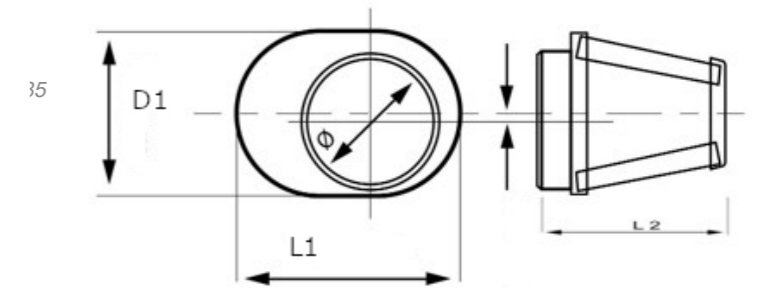

- Filtre à air universel cylindrique
- Filtre à air universel conique
- Filtre à air universel conique désaxé
- Filtre à air universel conique incliné

FILTRE A AIR CONIQUE DROIT

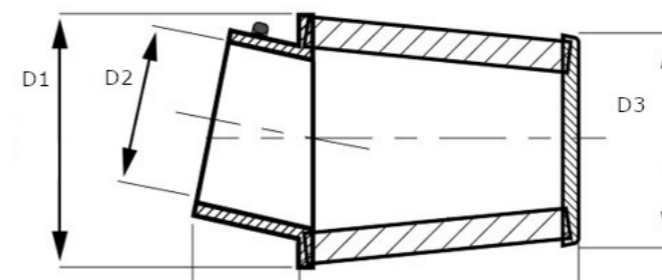

Filtre à air exemple CONB45-1S-WP
D1:90 D2:75 D3:50 L1:90 L2:108

FILTRE A AIR CONIQUE DÉSAXÉ

Filtre à air exemple CONCECC55S-WP
Longueur 100 mm - diam 55 mm

FILTRE A AIR CONIQUE INCLINÉ

Filtre à air exemple CONBINC60-1S-WP
D1:100 D2:60 D3:86 L1:128 L2:182

FILTRE A AIR CYLINDRIQUE

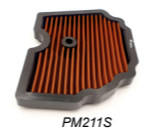

Filtre à air cylindrique, exemple : CONB52-1S-WP
D:90 D2:52 L1:102 L2:118
